

Railroad Model and Historical Assn. of El Paso, Inc.

Come see, learn, grow, and enjoy the art of model railroading. We have operating layouts in a scale you may remember from your youth.

Whether it's O, HO or N scale that excites you, it's all here ready to run.

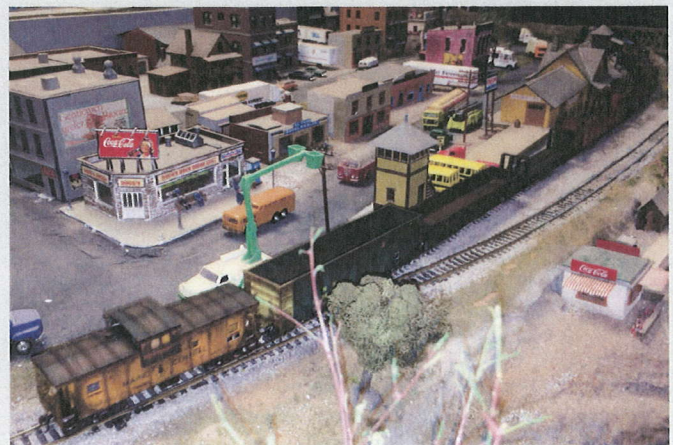

Your train still in boxes or not working? Maybe that is still on your bucket list. You've come to the right place. Unworkable rolling stock can be brought down on a Thursday evening for free inspection. Qualified members will check and diagnosis problems at no charge.

Maybe building is what interests you? We periodically conduct sessions on how to repair your rolling stock, how to decorate layout, how to build scenery, and how to properly care for and protect your investment in model railroading, and that's just to name a few. Come visit us.

Visit us for free...
any Thursday 7-9 PM

The Train Association sponsors model train exhibitions at public locations throughout the area. The history of railroads in the southwest and beyond are part of these events. These exhibitions bring the art and science of design, operation and maintenance of railroad models to a larger audience in the community. Our well maintained Library contains volumes of model train issues from the early 50's to today.
